

INDOOR TROPICS™

Create a tropical oasis inside your home or office.

High impact, high margins

Houseplants are a top seller in garden centers, and consumers are discerning. This line of plants is hand chosen by our product development team for success and variety of choices.

Healthier indoor environments

Houseplants provide a number of benefits that improve our health and environments: improving mood & focus, lowering stress, and improving air quality, to name a few.

Grown & Tested by Real People in Real Homes

Our line of specialty houseplants are grown in Southern California and are tested in real homes with a range of watering and light conditions.
