

# Sweetheart™ Mexican Sugar Maple

*Acer saccharum subsp. skutchii*

An Everde Growers® exclusive, this rare selection, native to the mountains of Mexico, features larger leaves and more drought tolerance with:

- Fast-growth and an upright, rounded habit with good branch structure
- Large palmately-lobed leaves with bright red new growth
- Fiery and brilliant yellow, orange and red fall colors

Adaptable and versatile, it is also tolerant of the intense heat, humidity and highly alkaline soils in San Antonio and the Hill Country.

Exposure	Water Needs	Dimensions
Full Sun	Low to Medium	30-40 feet tall x 15-20 feet wide

Key Features	Landscape Use	USDA Zones
Brilliant Color, Heat Tolerant, Lobed Leaves	Parks, Shade, Specimen, Urban Areas	7-10
