

Knee-High™ Bald Cypress

Taxodium distichum 'EverBarr' PPAF

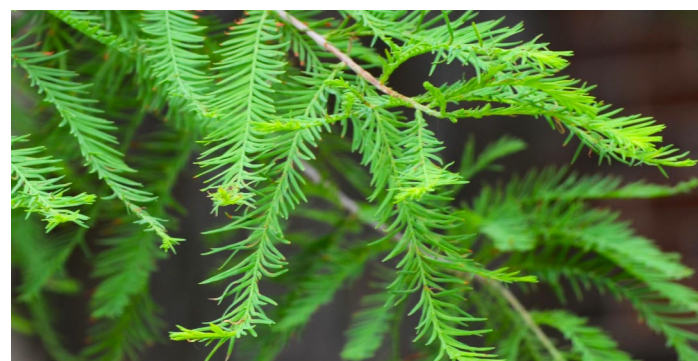

This compact variety of the deciduous conifer, native to southern swamps, bayous and rivers, is versatile and functional with its:

- Smaller stature in its iconic, pyramidal form
- Feathery soft, lime green foliage that turns cinnamon brown in fall
- Adaptability to wet or dry landscapes

An ecological wonder, its root system or “knees” will stabilize the soil, filter pollutants and provide shelter, while its cones provide food for a diverse range of wildlife.

Exposure	Water Needs	Dimensions
Full Sun	Medium to High	20 feet tall x 6 feet wide

Key Features	Landscape Use	USDA Zones
Adaptability, Unique Foliage and Form	Rain Garden, Habitat, Erosion Control	4-9

Plant Category

Deciduous Conifer

Bloom Color/Bloom Season

Inconspicuous / Early Spring

Maintenance Tips

Prune in late winter to remove damaged branches and mulch around the base to retain moisture
