

Sky-High™ Bald Cypress

Taxodium distichum 'EverBill' PP36806

This phenomenally long-lived, deciduous conifer with dense branching on a tall, linear form reaches for the clouds and rises magnificently above the landscape with its:

- Perfectly natural, pyramidal growth habit
- Feathery soft, lime green foliage that turns cinnamon brown in fall
- Adaptability to wet or dry landscapes

An excellent tree for urban streets and parks for their tolerance of poor soils, pollution and flooding, and ability to provide food and shelter for a diverse range of wildlife.

Exposure	Water Needs	Dimensions
Full Sun	Medium to High	50 feet tall x 12 feet wide

Key Features	Landscape Use	USDA Zones
Adaptability, Unique Foliage and Form	Specimen, Privacy Screen, Street Tree	4-10

Plant Category

Deciduous Conifer
